## CONVEYORS

*The Gentle Way to Convey*

Portable Conveyor feeds multiple inlets and reduces operator cost by making a dedicated conveyor for each inlet unnecessary. Unit can be customized and handles roasted and ground coffee, shelled and unshelled nuts, and other materials, conveying up to 37.2 m<sup>3</sup>/h (1,240 ft<sup>3</sup>/h). Unit's urethane disc removes residue with every rotation; other sanitary options are available.
